Contactless , Biometric , & Smart Solutions

Protecting people , property , and assets requires a security solution that works harder than you do.

"What about an access control system that delivers unmatched value and meets most of organizations unique security needs?"

Advanced systems and devices such as custom solutions, Virdi's access control as a solution empowers teams with enhanced situational awareness by bringing together visualization of data with system status and activity.

With Virdi products everyone from employees and visitors to managers and mentors can focus on their core business and responsibilities while feeling confident that they are being protected.

Innovative Technology

On-premises Virdi's updated and responsive design is highly intuitive and device compatible.

"List Of Achievements!"

◆ World's first Network Fingerprint Access Control system based on TCP/IP. **2001**

◆ FBI , FVC , NIST MINEX , VCCI Certified Fingerprint Recognition Algorithms. **2020**

◆ Patented Anti-Counterfeit Fingerprint Detection Technology. **2020**

◆ 1st place in the World Fingerprint Recognition Contest (FVC) for 9 Consecutive years. **2011 - 2019**

◆ World's first face recognition system with automatic angle control camera. **2015**

◆ World's leading performance Contactless biometrics system combined with fever detection. **2021**

◆ Liveness detection.

◆ Anti-spoofing attacks against photos , videos , and 3D masks.

What are Virdi Solutions?

A variety of security solutions, with cloud compatibility access unification. Whether as a software or hardware security system.

Virdi's Solutions We Offer ▼

Hardware

1 - UBio Family

Ubio-X Face , Iris , Pro , Pro 2 , Pro Lite , & Slim Biometric terminals are Contactless Face / Iris Recognition Systems with powerful performance functions and improved recognition algorithms.

2 - AC Family

AC 7000 , 5100 , 5000 Plus , 5000 Plus IK , 2200 , 2100 Plus , 2000 , & 1100 are Multimodal Face & Fingerprint recognition. Equipped with authentication algorithms to accurately recognize faces. In addition, all of this solutions are compatible with contactless cards for access.

3 - VS Card Reader

VS-R20D is a contactless smart card reader with a unique design and offers viable solution for smart card applicataions.

Software

1 - UBio Alpeta

A web-based integrated security solution. It provides functions for access control & time attendance management, as well as providing various functions according to packages.

2 - Contactless & Remote Visitor system

Non-contact and remote visitor system that allows people to apply for visitor registration using smartphones. To make visitor management easier and convenient.

3 - UNIS

An integrated security management system that allows access control, time, meal, & attendance management with SDK , providing an optimize solution to build a system in any environment.

4 - Mobile Card System
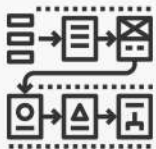

(AC5100 , 1100 , 2200 , 2000 , FMD-10)
Mobile key system incorporates mobile access into the current conventional access control system. Visitors can open doors with their smartphones while admin monitor and control.

Why **Softex** ?

Our story began in **2004**, we are a forward-looking company focused on building and offering professional solutions that are needed for the **21**st century. Accomplished **+1000** project, as well as we are a certified partner for Virdi Solutions.

Softex guarantee your business with premium service level agreement for support with the system products, and highly qualified team dedicated for your service.
